Eligible to work in Canada — Open Work Permit

SUMMARY

3D Modeler with production experience in VFX and game cinematics, specializing in character, prop, and hard-surface modeling. Skilled in texturing, look development, Houdini grooming, and Unreal Engine hair simulation. Brings strong communication, organization, and collaboration to team projects, along with curiosity to learn and grow, initiative & proactivity, and problem solving and critical thinking.

WORK EXPERIENCE

3D MODELER Apr 2025 – May 2026

COOT IMAGEWORKS (3D Animation & Motion Capture Studio), Bucheon, South Korea

- Modeled 22 character and asset components for released and unreleased game cinematics, including faces, bodies, creatures, costumes, armor, and props.
- Rebuilt low-resolution game assets as high-detail cinematic models through sculpting, retopology, UVs, PBR texturing, material adjustment, and look-development support.
- Created client-approved protagonist armor and costume assets for SOL: Enchant, including modeled ornamentation and details used in close-up shots.
- Developed a Houdini-to-Unreal grooming workflow that reduced typical hands-on creation time for comparable hair assets from about three days to one; created 12 production hair assets and documented the studio-adopted process.
- Created simplified proxy geometry to support rigging and FX workflows and reviewed assets with lighting and environment artists under final cameras.

3D MODELER Nov 2024 – Feb 2025

WESTWORLD (VFX Studio), Goyang, South Korea

- Rebuilt three production props from noisy 3D scans, resolving geometry, form, topology, and UV issues.
- Developed a mechanical-organic spacecraft asset from a single concept; a self-designed variation was selected unanimously by the modeling team.
- Recreated camera-visible vehicle geometry to support a compositing lighting pass for a green-screen sequence and participated in daily production reviews.

SKILLS

Software

Maya • ZBrush • Marvelous Designer • Substance 3D Painter • Houdini • Autodesk Arnold • Unreal Engine

Production Skills

3D Modeling (Characters, Props, Buildings, Hard-Surface) • High-Poly Sculpting • Retopology • UV Mapping • Texturing • Look Development
• Houdini Grooming • Unreal Engine Hair Simulation

EDUCATION

Sungshin Women's University Mar 2018 – Feb 2023

Bachelor of Fine Arts in Industrial Design, Seoul, South Korea

CG5 ACADEMY Feb 2022 – Apr 2024

Professional Training in 3D Modeling, Seoul, South Korea
