Modelling 1 Month | Texturing 1 Week

Armor, Costume, Ornament Modeling | Texturing

Hig-resolution character rebuilt from game-ready base data, with improved form and more defined anatomical structure.

Created for Netmarble's SOL: Enchant cinematic, the costume focuses on complex ornamentation and rich surface detail. All elements were fully modeled in geometry, with subtle depth variation to enhance dimensionality and avoid flatness.

STYLISH BEAST

2024

Modelling 2 Weeks | Texturing 3 Days | Fur 3 Days

Creature Modeling | Texturing | Lighting

A character based on an existing artist's original ape creature design, reinterpreted with a fashion forward concept. Focus was placed on integrating surface details such as tattoos, grooming, and accessories to enhance character identity.

Carey Mulligan

2023 - 2024

Modelling 2 Months | Texturing 1 Month

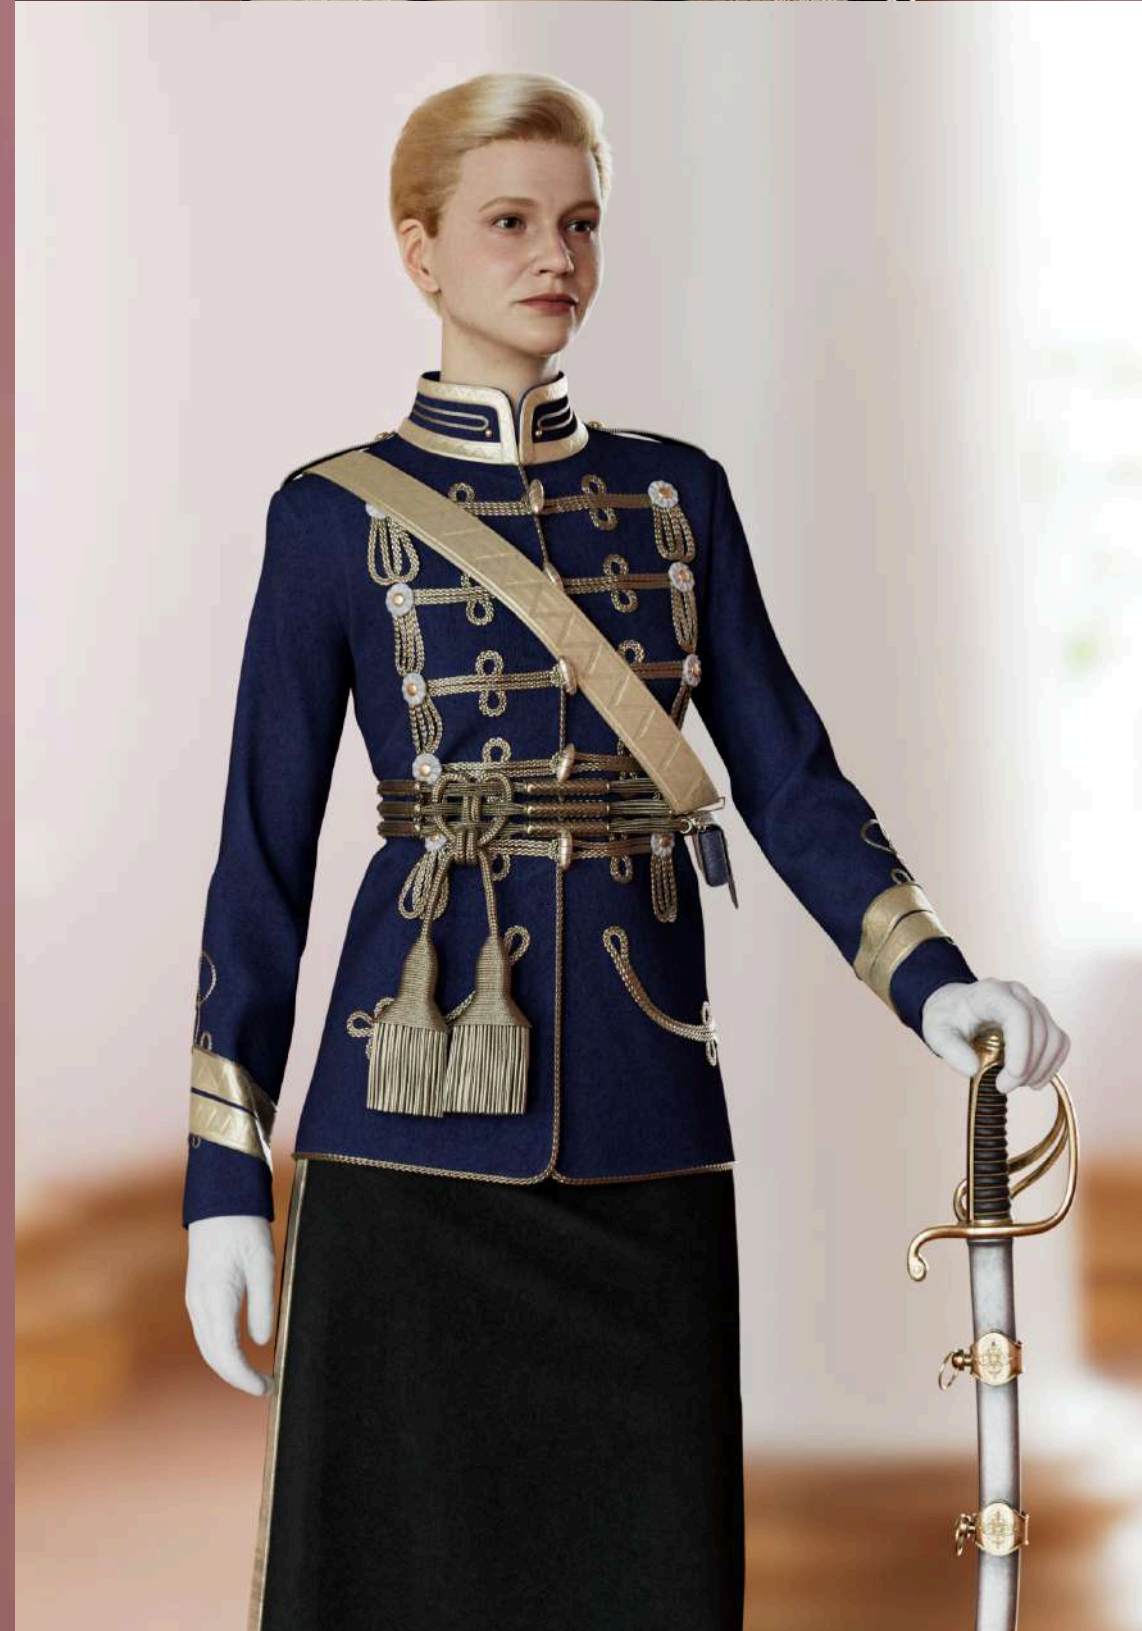

Character Modeling | Texturing | Lighting

A realistic character inspired by Carey Mulligan, developed with a focus on natural facial features and overall believability. Designed with an officer concept, with detailed costume work and surface development to support a refined and cohesive look.

EVANGELION Unit-01

2023

Modelling 1 Month and 1 Week | Texturing 1 Month

Hard Surface Modeling | Texturing | Lighting

Inspired by Neon Genesis Evangelion and an existing artist's work, this scene reinterprets Unit-01 within a post apocalyptic setting. It presents an alternate outcome where the unit remains abandoned, focusing on environmental storytelling, lighting, and cinematic mood.
