Modelling 1 Month | Texturing 1 Week

Armor, Costume, Ornament Modeling | Texturing

Rebuilt a high-resolution character from the original game model, improving its shape and anatomy. Created the armor and costume for Netmarble's SOL: Enchant cinematic, with detailed patterns and rich textures. Modeled all decorative details in geometry, using different depths to give them a more three-dimensional look.

STYLISH BEAST

2024

Modelling 2 Weeks | Texturing 3 Days | Fur 3 Days

Creature Modeling | Texturing | Lighting

Based on another artist's original ape creature design, this character was given a modern fashion style. Details such as tattoos, grooming, and accessories were added to give the character a stronger identity.

Carey Mulligan

2023 - 2024

Modelling 2 Months | Texturing 1 Month

Character Modeling | Texturing | Lighting

A realistic character inspired by Carey Mulligan, with natural facial features. The character was designed as an officer, with a detailed costume and textures that work well together.

EVANGELION Unit-01

2023

Modelling 1 Month and 1 Week | Texturing 1 Month

Hard Surface Modeling | Texturing | Lighting

Inspired by Neon Genesis Evangelion and the work of MILITELLO Florian, this scene shows Unit-01 abandoned in a ruined world. The setting and lighting help tell its story and create a cinematic mood.
